created_at	The date and time the record was created
updated_at	The date and time the record was modified
current_confidentiality_agreement	**A list of all confidentiality agreements a participant has accepted**
id	An identifier of the latest confidentiality agreement record the participant accepted
agreement_text	The URL to the project agreement
name	The name of the latest confidentiality agreement the participant accepted
pdf_file_name	The PDF file name for the latest confidentiality agreement the participant accepted
text_file_name	The text file name of the latest confidentiality agreement the participant accepted

Field Name	Details
participant_confidentiality_agreements	**A list of all confidentiality agreements a participant has accepted**
id	An identifier of the confidentiality agreement record
start_date	The start date for the participant confidentiality agreement
superseded_date	The superseded date for the participant confidentiality agreement
created_at	The date and time the record was created
updated_at	The date and time the record was modified
name	The name of the latest confidentiality agreement the participant accepted
pdf_file_name	The PDF file name for the latest confidentiality agreement the participant accepted
text_file_name	The text file name of the latest confidentiality agreement the participant accepted
agreement_text	The URL to the project agreement
participant_activity_logs	**A list of actions that occurred on a participants account (e.g, automated actions, actions by an apple employee, or actions by the participant)**
id	A unique identifier of the newly created record
activity_type	The activity type
activity_timestamp	The date and time of the activity
created_at	The date and time the record was created
updated_at	The date and time the record was modified
participant_notice_versions	**A list of email notices that have been sent to the participant**
id	A unique identifier of the notice record
date_sent	The date and time the notice version was sent
uuid	An identifier for the notice version specific to the participant
created_at	The date and time the record was created
updated_at	The date and time the record was modified
subject	The subject of the notification

Field Name	Details
resource_id	The identifier of the notice resource which is used in combination with the resource type to reference the build or project of the notification
resource_type	The notice resource type (e.g., build, project) which is used in combination with the resource id to reference the build or project of the notification
participant_projects	**A list of participant's projects**
id	A unique identifier of the projects record
status	The membership status of the participant
created_at	The date and time the record was created
updated_at	The date and time the record was modified
project_status	The project status (e.g., Active, Closed, Set Up)
project_name	The project name
participant_projects.confidentiality_agreement_participant_project	**The confidentiality agreement the participant agreed to as apart of the project**
created_at	The date and time the record was created
updated_at	The date and time the record was modified
name	The name of the latest confidentiality agreement the participant accepted
pdf_file_name	The PDF file name for the latest confidentiality agreement the participant accepted
text_file_name	The text file name of the latest confidentiality agreement the participant accepted
agreement_text	The URL to the project agreement
participant_projects.participant_project_builds	**The table that links participants projects and builds together; used to calculate build membership**
id	A unique identifier of a newly created record
has_been_notified	Whether the user has been notified about the build
created_at	The date and time the record was created
updated_at	The date and time the record was modified
build_number	The build number which represents the software build
profile_attributes	**A list of participant attributes used for categorization**
id	A unique identifier of the profile attributes record

Field Name	Details
attribute_name	The name of the attribute
attribute_value	The value of the attribute
created_at	The date and time the record was created
updated_at	The date and time the record was modified
profile_attribute_group_id	An identifier of the group, which represents multiple profile attributes
profile_attribute_descriptor	**The description of the profile attribute**
id	An identifier of the new record
owner	The owner of the profile attribute description
use_as	Describes how the profile attribute is intended to be used
category_as	The category of the profile attribute
family_as	The family of the profile attribute description
master_value	The master value of the profile attribute description
invitation_codes	**A list of invitation codes sent the participant**
id	A unique identifier of the invitation code record
code	The invitation code
expires_on	The date and time the invitation code expires
created_at	The date and time the record was created
updated_at	The date and time the record was modified
accepted_by_prs_id	The Apple account identifying number that accepted the invitation code
participant_project_id	The identifier of the participant
Acknowledgements	**A list of acknowledgements created when a user reads or views a download (e.g., read, unread)**
id	A unique identifier of the acknowledgements record
acknowledgeable_id	An identifier of the acknowledgement
acknowledgeable_type	The acknowledgement type (e.g., download, announcement)
created_at	The date and time the record was created
title	The localized version of the announcement title
name	The localized version of the download display name
